Topic : Concept paper

Title : Problems = Solution

Idea : There is no world without problems. There is no end of problems in our life. There are always small problems in our life. We give up when we see problems. As a result, when a big problem arises, we get lost in the abyss. The solution does not find any cool edges. But it is possible to solve everything with a little cold thinking. Because if there is a problem, there is a solution. If there were only problems in the world and if there was no solution, then this world would have been destroyed long ago. Problem and solution complement each other.

Visualisation

Shot 1:

Each letter of 'problem' will be written on different colored paper and each letter will be of different size. Two brain pictures will be given equal marks. And writing the solution will be simple.

Message: This means that we can solve any problem by thinking. If there is a problem, there is a solution.

Other Massage : Each letter of 'problem' is a different size. It means that we will have different types of problems in our life and also have solutions.

Camera Angle : Mid , pan left to right.

Background music : Intro music

Shot 2:

My headphones are knotted. I am also trying to open it. But after a while I get impatient and throw it away.

Message : A knot in the headphones signifies life's small problems. As a result we become impatient.

Other message : This is a technical problem that we face everyday.

Camera Angle : Wide- close- Mid , Static

Background Music : Technical problem related music.

Shot 3 :

This time I went to work on the camera. There are many cable knots. I am trying to open up a lot. But I can't. Disappointed again, I threw it away.

Message : Here big problems in life are meant by knotting the big cable. Which is very much related to our life.

Other Message : In the technical field we have to face many kinds of big problems again and again.

Camera Angle : wide - close - wide. static .

Background music : Technical problem related music.

Shot 4 :

I am standing in a place where there are many cable knots above my head. I'm just looking up. I don't know what to do.

Message : It means that we often drown in the sea of problems. We understand what to do.

Other message : Technically, the higher we go, the bigger problems we face.

Camera Angle : Low mid- close up. static.

Background Music : Disappointed related music.

Shot 5 :

I am standing. The shoelaces are tied. I can't walk.

Message : Unable to solve the problems that caused our life to stop moving forward.

Other message : Technically, if we do not avoid these problems, we can stop.

Camera Angle : Wide - close - wide. zoom.

Background Music : Any soft music.

Shot 6 :

I stood in front of the basin and watered my face very worried. When I look in the mirror, the problem is written on the mirror.

Message : This means that when we are unable to solve a problem, many other problems arise. As a result we get scared.

Other message : When these technical problems occur our life becomes unbearable.

Camera Angle : Wide - mid - close. static.

Background music : Scared and water related music.

Shot 7 :

At this stage I would lie in bed calmly thinking about the problems and the problems would flash before my eyes. Then when I close my eyes, the knot of cables shown earlier will open.

Message : This means that with a little thought, our problems can be solved.

Camera Angle: Wide- mid - close - extreme close . Static.

Background Music : Sleep mood music

Shot 8 :

In the last shot I will show my headphones untied, my shoes untied and I can walk.

Message : This means that with a little thought we can solve all our problems.

Camera Angle : Close up- mid . static , follow.

Background Music : Soft music.

Production Plan

Cast : Sad Bin Abbas Sanim

Props:

Headphone
Camera equipments
Shoes

Camera : Sony a7 r4

Editing : Sad Bin Abbas Sanim

Helping Hand : Thirtha Biswas

Location : Uttara
